

The **POWER SHELF**

With the Power Shelf the outlet can serve a greater purpose.

I personally want to thank you for viewing the Power Shelf information. I know your time is valuable and I truly appreciate you and your time.

As you look over this packet you will realize that the Power Shelf options are endless. Then you will think of where you could use a few.

The Power Shelf can be used in every household for everyday electronic organization.

The Power Shelf can be used by every hobbyist from those who tinker in the garage or woodshop to those who are crafters or scrapbookers.

The Power Shelf can be used in every type of business small or large. From office organization, warehouse organization and plant production area organization.

Everyone could use more than just one!

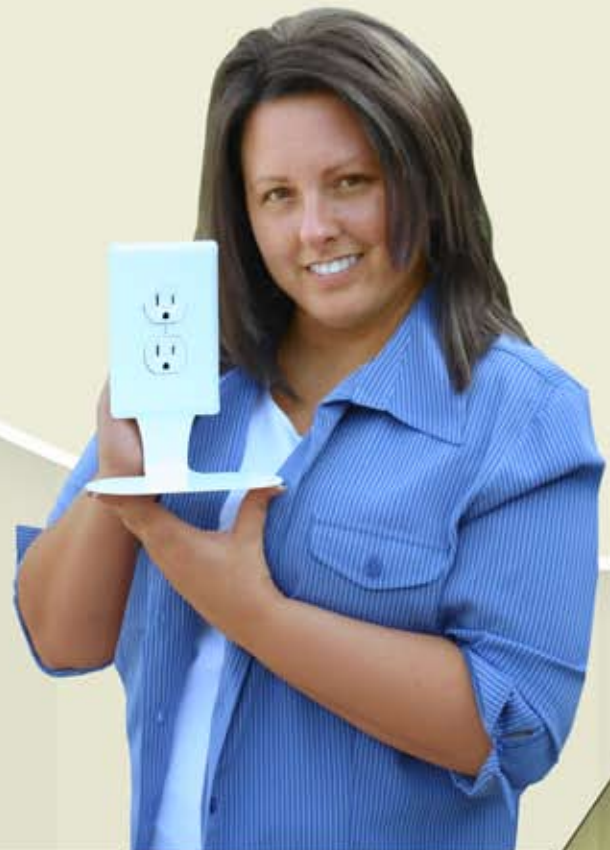

*Remember when you're asked
"What is a Power Shelf?"*

The best answer is "The Power Shelf is THE answer to all your electronic organizational needs!"

Thank you again,

Lynn Fetzer - Westmeister

Power Shelf Inventor / CEO of the Power Shelf

About The Power Shelf

All Power Shelf products are 100% made in the U.S.A. in Plymouth Ohio at the Fetzer family owned and operated factory which has been in operation for over 25 years. The Power Shelf is manufactured using only the finest quality material and the most durable powder coating finishes. Standard and custom colors are available.

The Power Shelf product line is such an innovative and revolutionary idea that there are multiple patents pending. They are designed to provide a secure, organized way to store excess cords and charge your hand held electronics.

The Original Power Shelf

The innovative patent pending design of the Power Shelf is changing how we think of the common outlet. It provides a fresh perspective on how hand held electronics can be stored and charged in an organized, convenient manner.

With the Power Shelf the outlet cover can now serve a greater purpose. The revolutionary tapered design allows the cord for your electronic device to be wound around the base of the shelf keeping annoying and unsightly cords organized. The original Power Shelf measures 2.5" wide x 5" long.

The Mega Power Shelf

The Power Shelf's patent pending design is changing how we think of the standard outlet. This unique product is revolutionizing the way hand held electronics are stored and charged. The Power Shelf is providing an organized convenient manner of storage.

With the Power Shelf the outlet cover can now serve a greater purpose. The Mega Shelf's tapered design allows the cord for your electronic device to be wound around the base of the shelf keeping annoying and unsightly cords organized. The Mega Shelf measures 5" wide x 9.25" long.

The Power Hook

The Power Shelf's patent pending design can be used in many different ways. From hanging your extension cords to installing it on switch to hold a jacket or hand bag. The uses are endless.

With the Power Shelf the outlet cover can now serve a greater purpose. The Power Shelf's tapered hook allows the cord to be wound around the formed hook keeping your cords functional, easily accessible and tangle free.

The Combo Power Shelf

The patent pending design of the Combo Power Shelf is changing how we think of the common outlet. With combining the revolutionary design of the Mega Shelf and the Power Hook it is truly the ultimate functional design.

With the Power Shelf the outlet cover can now serve as a functional tool. The revolutionary tapered design allows the cord for your electronic device to be wound around the base of the shelf keeping annoying and unsightly cords organized while providing the intergrated hook that keeps your extension cord always accessible and functional at all times. This ultimate garage tool can be used in many different ways.

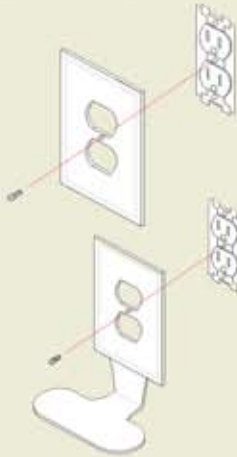

EASY AS 1, 2, 3
